Devtools > Audits > Accessibility

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

ARIA — These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

- ▲ Elements with `[role]` that require specific children `[role]`s, are missing. ✓
- ▲ `[role]`s are not contained by their required parent element ✓
- ▲ `[aria-*)` attributes do not have valid values ✓

Contrast — These are opportunities to improve the legibility of your content.

- ▲ Background and foreground colors do not have a sufficient contrast ratio. ✓
