Роли элементов

Определяет то, чем логически является элемент.

```
Виды ролей:
```

- Widget roles (button, checkbox, link, menuitem, ...)
- Composite roles (radiogroup, menu, grid, ...)
- Document structure roles (article, document, feed, img, table, ...)
- Landmark roles (banner, form, main, navigation, search, ...)

```
<div role="button">...</div>
```

Состояния элементов

- > Widget attributes (aria-hidden, aria-checked, aria-disabled, aria-required)
- Relationship attributes (aria-describedby, aria-labelledby)
- Live regions (aria-live)
