Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

ARIA — These are opportunities to improve the usage of ARIA in your application which may enhance the experience for users of assistive technology, like a screen reader.

⚠ Elements with `[role]` that require specific children `[role]`s, are missing. ⌄

⚠ `[role]`s are not contained by their required parent element ⌄

⚠ `[aria-*]` attributes do not have valid values ⌄

Contrast — These are opportunities to improve the legibility of your content.

⚠ Background and foreground colors do not have a sufficient contrast ratio. ⌄
